

Customer Testimonials

We believe in developing long term partnerships with our customers and measure our success by helping them achieve their goals. Read what a few of our customers had to say about us!

"Excalibur would explain not only how something was built, but why it was built that way. They would always provide solutions that set the groundwork for growth and expansion so that we were not cornered or hardcoded into a certain method."

- Leading Healthcare Organization

"Excalibur worked with our company to complete an aggressive and robust IT Service Management project. The company's leadership team has taken notice of the many benefits that the system now offers. We look forward to working more with Excalibur and the talented people of the company."

- Leading Law Firm

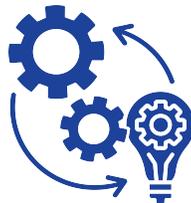

"What I appreciated the most about Excalibur was their willingness and ability to adjust when new project parameters were identified. I felt we had a trusted partner, where all options were always open for discussion."

- Mid-Sized Utility Company

"We have been a Cherwell customer since 2014. Being that we didn't have the resources to create the system we had in mind, Cherwell hooked us up with one of their partners, but that initial relationship did not pan out. Then we found out about Excalibur, from our initial meeting, we knew we found our forever Cherwell consultant."

- Major Environmental Absorbent Manufacturer

"Excalibur Data Systems has been our partner as we implemented Cherwell as our Service Management platform. From design to implementation and optimization, they have provided excellent consulting services. We have worked with several of their consultants, and each one was a true Subject Matter Expert on Cherwell. One thing I really appreciate is that Excalibur knows what works and what doesn't and is honest with us as we build on our Cherwell platform. Excalibur Data Systems is one of our trusted partners."

- Leading Engineering, Planning, and Environmental Sciences Company

"We could not have asked for a better implementation partner than Excalibur Data Systems and Mike Fuson. Mike worked closely with our implementation team for administrator training and knowledge transfer. He was there to assist us along the way with experience and insight, but ensured we were self-sufficient and successful by the conclusion of our implementation. Mike and Excalibur Data Systems delivered."

- U.S. Higher Education Institution
